

Rimoldi

da più di 140 anni Made in Italy

Welcome to
Rimoldi & CF!

2023 

Rimoldi

Rimoldi & CF è l'azienda leader in Europa in grado di offrire soluzioni di elevata qualità all'industria dell'abbigliamento: macchine per cucire industriali, apparecchiature e ricambi, consulenze, servizi di start-up e formazione presso la propria sede e presso il cliente.

Siamo a Gallarate, a pochi minuti dall'aeroporto di Malpensa e disponiamo di un ciclo produttivo completamente verticalizzato. In sede, una grande show room è a disposizione dei clienti, oltre al magazzino ricambi, guide e a tutti gli uffici.

Le parole chiave dell'azienda sono:

- **Made in Italy:** tutte le nostre macchine, le apparecchiature e i ricambi sono rigorosamente prodotti in Italia, adatti per i settori di abbigliamento più disparati quali intimo, collant, casual, jeans, biancheria per la casa, pelletteria, maglieria esterna, abiti da lavoro ecc.
- **Progetti chiavi in mano:** siamo famosi e apprezzati nel mondo per essere in grado di pianificare e preparare impianti completi di produzione, assicurando anche il supporto di professionisti altamente specializzati per la formazione del personale sia per quanto riguarda l'utilizzo e la manutenzione delle macchine, sia per la gestione della linea stessa.
- **Servizio post-vendita:** il cliente trova presso di noi tutto ciò di cui ha bisogno per poter effettuare una manutenzione di qualità, grazie alla quantità di ricambi che manteniamo a stock per le macchine nuove, usate e per quelle obsolete.
- **I nostri ricambi ORIGINALI** garantiscono una lunga vita e un'ottima performance alle macchine e considerando la differenza esigua di prezzo tra i ricambi originali e le copie, vi ricordiamo di richiedere il vostro ID e PASSWORD per poter effettuare ordini on line verificando prezzi e sconti.
- Disponiamo da sempre di una divisione **APPARECCHIATURE DI SERIE E SPECIALI:** il segreto delle macchine per cucire più performanti è a volte la guida giusta per assicurare un prodotto finito sempre uguale e qualitativamente perfetto. Le guide speciali, fatte su misura per il cliente, sono la risposta a problemi a volte insormontabili che, grazie alla perizia e alla preparazione dei nostri tecnici, vengono risolti in brevissimo tempo.
- Il nostro sito web: www.rimoldiecf.com e la pagina Facebook completano il nostro servizio di informazione e comunicazione al cliente.

Rimoldi ha deciso di seguire i propri clienti in modo professionale anche e soprattutto dopo la vendita per assicurare tranquillità e certezze a chi produce abbigliamento di qualità.

Orgogliosi di essere il partner affidabile per tutti i nostri clienti, ringraziamo per avere scelto Rimoldi e i suoi prodotti!

Lo staff Rimoldi & CF srl

il Bel Paese!

Rimoldi & CF wants to be the Company always offering high quality and Made in Italy solutions all over the world for Industrial sewing machines, attachments, spare parts, consultancy-, start-up- and training services.

We are located at Gallarate, just a few minutes from Malpensa Airport and we have a complete vertical production cycle further than show room, warehouse, commercial and administrative offices.

All our Rimoldi machines are strictly "made in Italy" and suitable for all production fields:

underwear, bathing suits, sportswear, panty hoses, shirts, hosiery, jeans, casualwear, t-shirts, polo shirts, seamless, working suits etc.

We are appreciated and famous for our "turn-key" projects, being able to organize the production plants with our machines assuring start up and training for workers, made by skilled technicians and production line trainers.

We assure to the customers a complete "Service Package" made of : consultancy, high quality "made in Italy" sewing machines, always prepared following customers' requirements, using their fabrics and threads for tests, always delivered "ready-to-be-plugged in". We do not consider the shipment as the final step of a business but the beginning of a steady and long lasting cooperation.

Our after-sale service is also very important for us. Our customers always find what it is necessary to proceed with a good maintenance of their machines and for this reason, we keep on stock thousands of spare parts of our production, either for new or for old and obsolete Rimoldi machines.

We always recommend using genuine spare parts as they only guarantee a long life to Rimoldi sewing machines and because the difference in price is so few that a bogus part cannot compete with the genuine one. We are inviting to ask for the ID and the password in order to enter our web site and get prices and discount rates. You will be surprised to see that the prices of equivalent parts are almost the same of the Rimoldi genuine ones.

We have a specific division producing attachments; we keep a large stock for standard items but we can also produce special and tailor-made folders and binders to meet with our customers' requirements perfectly, in few days.

We invite you to reach us on our web site www.rimoldiecf.com and on Facebook as well.

Proud to be your right partner to achieve successful results!

Rimoldi Staff.

Rimoldi & CF srl est le leader Européen capable de soumettre solutions de qualité à l'industrie de l'habillement : machines à coudre industrielles, attachements, pièces de rechange, services de consultances, de mise en marche et de formation chez son propre siège ou chez le client.

Notre siège est à Gallarate, à peu de minutes de l'aéroport de Malpensa et disposons d'un cycle de production complètement verticale.

Une salle exposition est à disposition des clients ainsi que le stock des pièces de rechange et de guides et tous les bureaux.

Les mots « clé » de notre usine :

Made in Italy : toutes machines, attachements et pièces détachées sont rigoureusement produits d'Italie, valables pour les secteurs d'habillement plus différents : lingerie, maillot de bain, habillement de sport, chemises, bonneterie, jeans, casuel, t-shirt, maille polo, sans-couture, tenues de travail etc.

Projets clé en main : nous sommes très appréciés dans le monde entier pour les projets et la préparation d'installations complètes de production, grâce à des professionnels hautement qualifiés pour la formation soit au niveau de l'exploitation et de la maintenance, soit pour la gestion de la ligne de production.

Service après-vente : chez nous le client trouve tout ce dont il a besoin pour effectuer une maintenance vraiment appropriée, grâce à la quantité et à la qualité des pièces gardées à stock, soit pour les machines nouvelles que pour les anciens, que pour les obsolètes.

Nos pièces de rechange ORIGINAUX garantissent une longue vie et une performance optimale à toutes machines et en considération de la petite différence entre nos prix et ceux des copies, nous vous rappelons de demander votre ID et MOT DE PASSE pour effectuer vos commandes et vérifier remises et prix.

Depuis toujours, nous sommes producteur d'excellence des GUIDES DE SERIE ET SPECIAUX : le secret des machines à coudre plus performantes est parfois le guide correct pour assurer un produit fini toujours pareil et parfait au point de vue qualitatif.

Les guides spéciaux, produits selon la demande du client, sont la réponse à des problèmes parfois insurmontables, qui trouve solution grâce à la capacité de nos techniciens.

Notre site web : www.rimoldiecf.com et la page Facebook complètent le service d'information et de communication avec la clientèle.

Rimoldi a décidé de suivre ses clients de manière professionnelle même et surtout après la vente pour rassurer les producteurs d'habillement d'avoir un vrai et fiable partenaire.

Merci d'avoir choisi Rimoldi et ses produits !

L'équipe Rimoldi

Rimoldi & CF es la empresa leader en Europa capaz de ofrecer soluciones de alta calidad en la industria de la confección: máquinas de coser industriales, dispositivos y repuestos, asesoramiento, servicio de puesta en marcha y formación bien sea en nuestra sede que directamente en el establecimiento del cliente.

Estamos en Gallarate, a pocos minutos del aeropuerto de Malpensa, disponemos de un ciclo de producción completamente vertical. Disponemos de una gran sala de exposición a disposición de todos los clientes, almacén de recambios y guías junto con todas las oficinas.

Las palabras clave de la empresa:

Made in Italy : todas nuestras máquinas, dispositivos y recambios se producen exclusivamente en Italia, son adecuados para los sectores de la ropa de vestir más raros, como ropa interior, collant, ropa deportiva, jeans, ropa para el hogar, peletería, genero de punto, prendas de trabajo, etc, etc.

Proyecto llave en mano : tenemos fama y nos aprecian en el mundo por estar a la altura en planificar y preparar instalaciones completas de producción asegurando el soporte de personal altamente especializado para la formación del personal bien sea para el uso y mantenimiento de las máquinas que para la gestión de la misma línea.

Servicio post-venta : en nuestro establecimiento el cliente encuentra todo lo que necesita para efectuar mantenimiento de calidad, gracias a la cantidad de repuestos de que disponemos bien sea para máquinas nuevas, usadas e incluso para las más antiguas

Nuestros recambios originales son de granduración, óptimo rendimiento de las máquinas, considerando la diferencia mínima entre recambios originales y sus copias, les recordamos que pueden solicitar sus datos personales ID y contraseña para que puedan efectuar pedidos via WEB comprobando precios y descuentos.

Desde siempre disponemos de un departamento de guías especiales: el secreto para obtener una prenda acabada y de máxima calidad depende muchas veces de la guía correcta. Guías especiales fabricadas a medida para el cliente, son la respuesta a problemas insuperables que gracias a la preparación de nuestros técnicos, se resuelven en poco tiempo.

Nuestro sitio web :www.rimoldiecf.com, y página facebook completan nuestro servicio de información y comunicación con el cliente.

Rimoldi ha decidido seguir sus propios clientes con profesionalidad y sobre todo después de la venta para asegurar la tranquilidad y seguridad a quien produce ropa de vestir de calidad.

Orgullosos en ser el partner de confianza para todos nuestros clientes, les agradecemos por haber elegido Rimoldi y sus productos !

Elequipo Rimoldi& CF Srl

Rimoldi & CF является лидером в Европе. Мы в состоянии предложить решения для швейной промышленности самого высокого качества: швейные машины, приспособления и запчасти, консультации, сервис по организации и обучению персонала непосредственно на предприятии клиента.

Мы находимся в Gallarate , в нескольких минутах езды от аэропорта Милан – Малпенса. Наш производственный цикл полностью вертикализирован. У нас вы найдёте большой выставочный зал, склад запчастей и приспособлений и все наши офисы.

Made in Italy: все наши машины, приспособления и запчасти производятся в Италии. Наше оборудование используется в самых различных сферах швейной промышленности : нижнее бельё, чулки и колготки, джинсы, постельное бельё, повседневная одежда, изделия из кожи, верхний трикотаж, рабочая одежда и т.д.

Разработка проектов: нас знают и ценят во всём мире за способность спланировать и подготовить полный комплекс оборудования для производства, гарантируя профессиональную поддержку серьёзных специалистов в подготовке и обучении персонала как по использованию и обслуживанию оборудования, так и по организации процесса непосредственно на производственном потоке.

Сервисное обслуживание: клиент найдёт у нас всё необходимое для качественного обслуживания оборудования, благодаря большому количеству запчастей на нашем складе как для новых, так и для очень старых машин.

Наши оригинальные запчасти гарантируют машинам долгую жизнь и хорошую производительность. Учитывая небольшую разницу в ценах оригинальных и неоригинальных запчастей, рекомендуем запросить ID и PASSWORD для заказов он лайн и для доступа к информации о ценах и скидках.

У нас имеется отдел стандартных и специальных приспособлений: очень часто секретом более производительной швейной машины является правильно подобранное приспособление, которое гарантирует постоянное качество изделий. Специальные приспособления, изготовленные нашими высоко профессиональными техниками по заказу клиента, являются порой единственным решением непреодолимой проблемы.

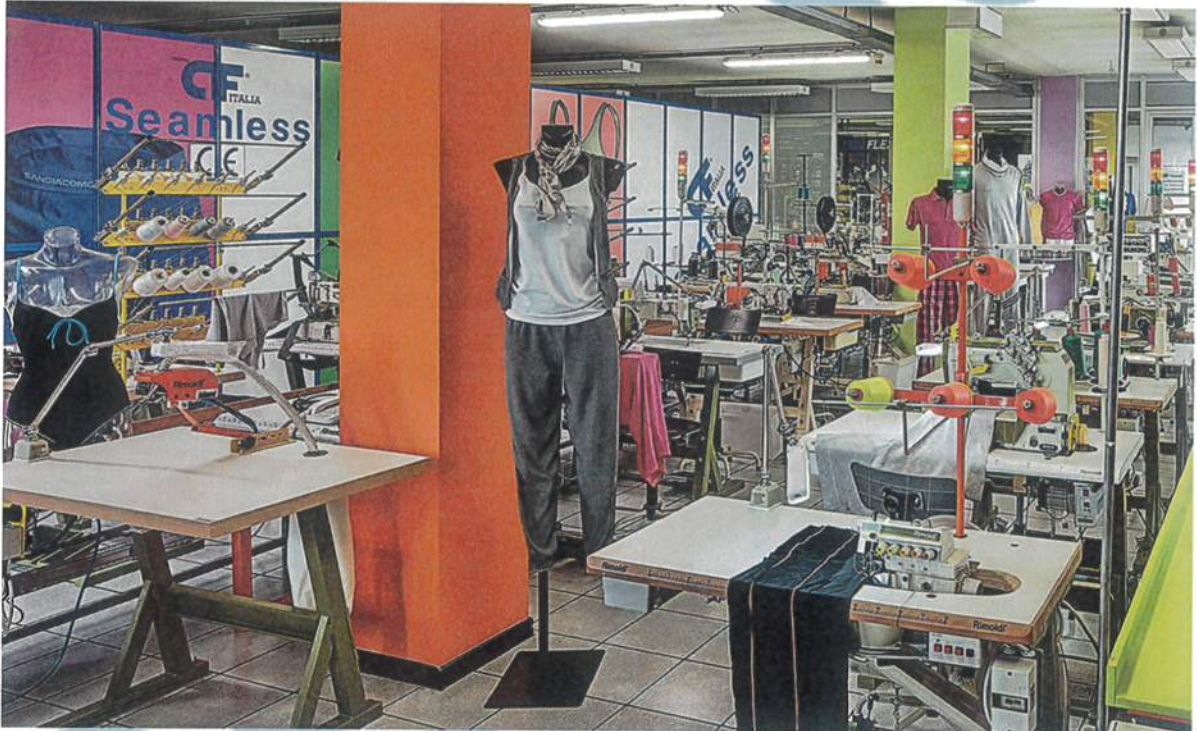

Наш сайт: www.rimoldiecf.com и страница Facebook дополняют наши услуги по информации и поддержания контактов с нашими клиентами.

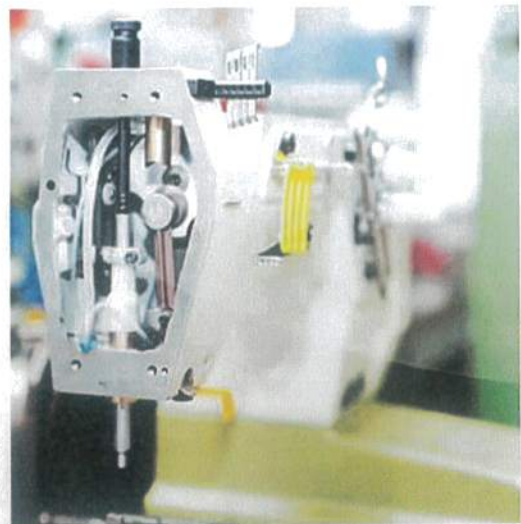

Rimoldi даёт своим клиентам профессиональную поддержку как в момент заказа оборудования, так и после продажи, гарантируя спокойствие и уверенность производителям качественной продукции.

Мы гордимся возможностью предложить надёжное партнёрство всем нашим клиентам и благодарим за выбор Rimoldi и нашей продукции!

Macchina per imbastire a punto catenella a un filo. Destinata all'industria della confezione e per le operazioni preliminari in tintoria.

Velocità fino a 3100 RPM

- 1 ago
- Punto catenella semplice (101)
- Lubrificazione forzata a pompa
- Regolazione punto a eccentric
- Lunghezza del punto 12 mm (15/32)
- Senza differenziale

26404 1MB02 è una macchina a base piana per tutte le operazioni di infilatura per l'industria della confezione e per le operazioni preliminari in tintoria.

Esegue cuciture a punto catenella a 1 filo facilmente sfilabile, la cui funzione è quella di preparare le operazioni successive.

Spazio libero a destra dell'ago: 22 cm (8.3/4")

Peso : netto kg 48 – Lordo kg. 70
Imballo su pallet: 60x60x60h cm

Single thread chain stitch basting machines for medium and heavy ready-to-wear clothing industry and dye houses.

Speed up to 3100 RPM

- 1 needle
- Single chain stitch (101)
- Pressure lubrication
- Eccentric cam type stitch regulator
- Stitch length 12 mm (15/32)

It is a flatbed machine to do basting seams on jacket, dresses, coats, and for joining fabric pieces in preparatory dye-house operations.

It make single thread chain stitch seam, which can be easily undone and prepare the workpieces for subsequent operations.

Equipped with eccentric came type stitch regulator, pressure lubrication, without differential feed.

Free space to the right of the needle: 22 cm (8.3/4")

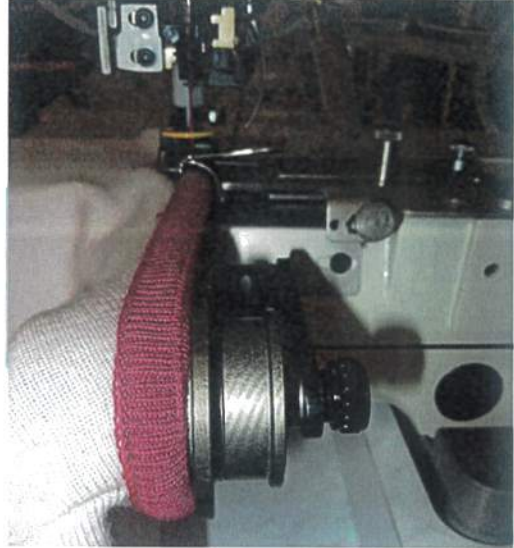

Weight of head: net weight kg 48 – gross weight kg. 70
Packed on pallet: 60x60x60h cm

R BASS 3050

SEWING SYSTEM FOR POCKET OPENING

The BASS 3050 is a sewing system that can process all prevalent straight pocket openings with or without flaps.

Simple operation and high working speed characterise this universal automatic welted pocket machine.

Advantages

- Up to 2400* welted pockets in 8 hours

- Simple operation – Quick learning process

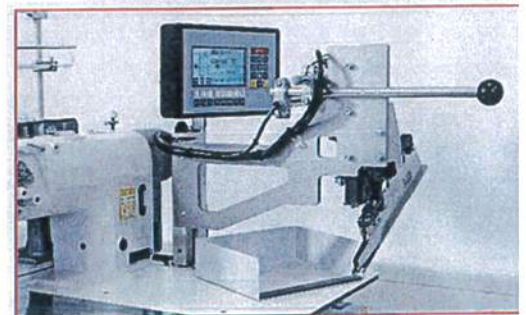

- High degree of automation

- High operating speed

- * Depending on the shape of the pocket and number of additions (pocket pouches, welts, flaps, facings)

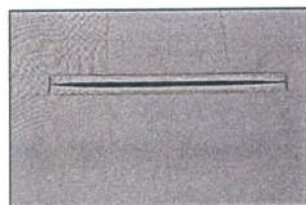

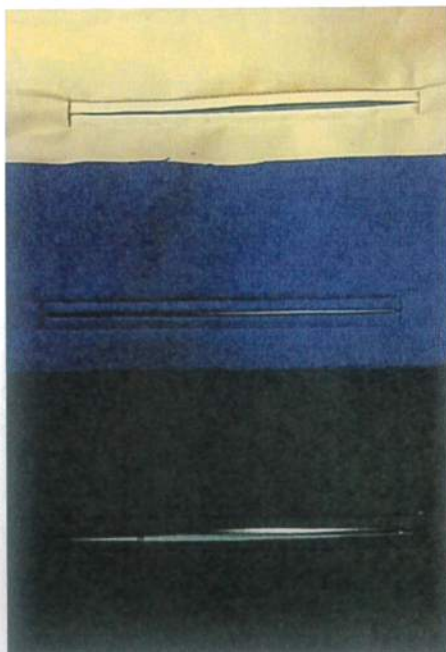

Easy administration and retrieval of the pre-programmed seams for diverse applications

The swivel-out folding station enables easy access for set-up and service work

Sample seams

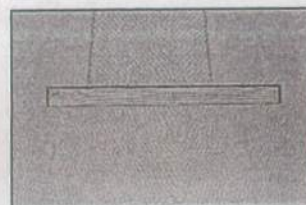

All straight double or single welt pockets, with or without flaps can be processed.

CF 0450

Fusing machine for roll or stripes.

CF 1900 model B

CF 1910 model A

Equipped with: synchronized re-winder, adjustable guide, top and bottom tape racks, side tables with wheels.

TECHNICAL FEATURES

Working area	450 mm
Power feed	Monophase 220 volts
Power absorbed	3,6 KW
Temperature	200° C max
Pressure	1 kg/cm² max
Speed	3 > 34 m/min
Case dimensions	1300 x 1200 x 1150 mm
Weight	320 Kg

CF T/50

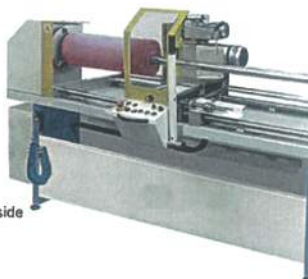

Manual roll slitter T/50 with semi-automatic positioning of the blade carriage up to the requested cut size.

The machine can process most of materials in rolls (bias or warp and weft fabric, knitwear etc)

The width of the cut can be manually adjusted.

TECHNICAL FEATURES

Roll diameter: 200mm
 Roll length: up to 1600 mm, having a shaft diameter of 48,9 mm and inside carton roll diameter of 50 mm
 Equipped with winding, re-winding device and lubricating device
 Compressed air: 6 bar
 Power: 220-volt single phase

MODULES

OUR ATTACHMENTS

CON LE NOSTRE APPARECCHIATURE ABBIAMO "VESTITO" MIGLIAIA DI MACCHINE PER CUCIRE NEL MONDO

Antonio Pastorello, chairman della società Rimoldi & CF, ha iniziato come semplice "garzone di bottega" ma grazie al suo entusiasmo, passione e determinazione comprese che alle macchine per cucire mancava solo un accessorio fondamentale:

L'APPARECCHIATURA

essenziale per eseguire operazioni difficili e spesso multiple in una volta, velocizzando i processi produttivi e quindi fondamentale per ridurre i costi di produzione
 Prodotte in acciaio inossidabile garantiscono maggiore affidabilità e produttività, garantendo alta qualità al capo finito.

Produciamo migliaia di guide STANDARD e SPECIALI, fatte appositamente seguendo le esigenze del cliente.

Il tempo di consegna è quanto di meglio si possa chiedere: quando non immediatamente disponibili, chiediamo solo pochi giorni perché sappiamo che chi produce abbigliamento non può attendere e per quanto riguarda il rapporto qualità-prezzo, possiamo confermare che è ottimo, parola dei nostri clienti

OUR FOLDERS AND GUIDES EFFICIENTLY COMPLETE ALL SEWING MACHINES OF ALL BRANDS

Mr. Antonio Pastorello, chairman of Rimoldi & CF, started working long time ago as a simple worker but his enthusiasm combined with hardworking, diligence, passion and persistence helped him to understand that on all industrial sewing machines only an important accessory was still missing:

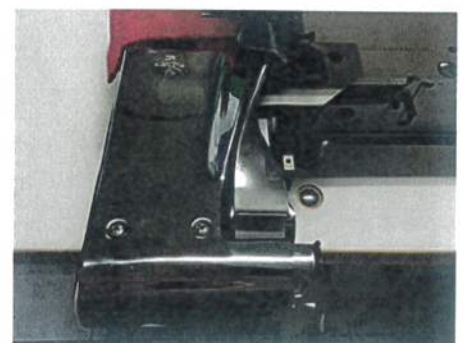

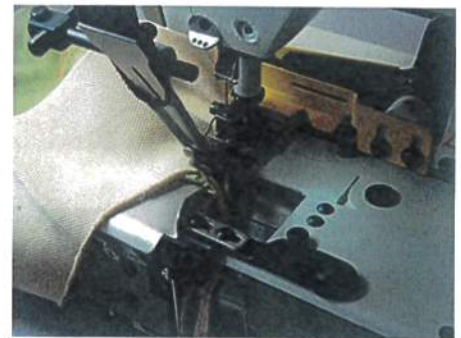

THE ATTACHMENT

essential to do difficult and sometimes multiple operations in one time and necessary to reduce garment production costs.

Made of stainless steel, they guarantee more production on the chain and higher quality of the finished garments.

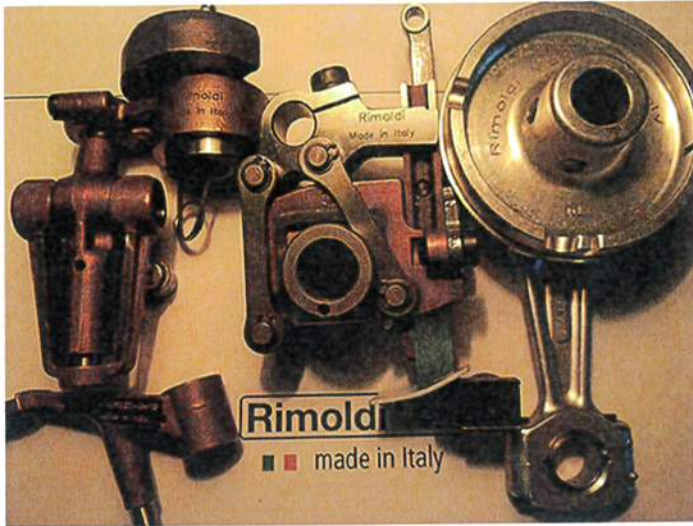

Our attachments production plant produces thousands of either STANDARD or SPECIAL "tailor made" folders, prepared according to customers' requests.

The delivery time is perfect: when not immediately available few days only will be necessary, as those who produce garments cannot wait and the quality-price ratio is satisfactory.

SOMETHING ABOUT US.....

Tecnologia “chiavi in mano” per l’abbigliamento

Stefania Pastorello descrive il mondo delle macchine per cucire industriali, e spiega come adesso più che mai serva «avere il coraggio di puntare sulle eccellenze del nostro paese»

Ripartire lavoro e fiducia in Italia. Una promessa, un obiettivo, una speranza cui i governi che si sono susseguiti in questi anni di crisi avrebbero dovuto attendere. Ma, per quanto la responsabilità della ripresa finora molto lenta e incerta si debba ricercare nell'azione politica poco efficace che la nostra classe dirigente ha espresso, non sono pochi gli imprenditori che credono nel coraggio di investire in patria. Tra le aziende che hanno fatto propria questa filosofia, c'è Rimoldi & CF, che produce macchine per cucire industriali e accessori di alta qualità e performance per l'industria dell'abbigliamento. «Crediamo nella grande forza e conoscenza del sistema Italia – dice Stefania Pastorello, amministratore delegato dell'impresa di Gallarate (VA) – per questo affrontiamo la produzione cento per cento Made in Italy. Solo così siamo certi di realizzare prodotti ai massimi standard possibili. E i risultati

ottenuti ci danno ragione: chi produce intimo, maglieria esterna, calze, sportswear, seamless, costumi da bagno, abiti da lavoro, magliette polo e quant'altro, conosce bene la qualità e le prestazioni delle nostre macchine, preparate in base alle esigenze dei clienti». Rimoldi ha una struttura produttiva verticalizzata. «Per quanto riguarda la produzione – dice Pastorello –, eseguiamo la lavorazione della ghisa in un'unità produttiva di proprietà. Nella nostra officina meccanica produciamo le parti meccaniche destinate all'assemblaggio delle macchine e alla vendita dei ricambi, realizziamo i trattamenti termici di finitura, l'assemblaggio, il rodaggio e la campionatura della macchina per cucire. Le nostre macchine per cucire sono divise in 5 grandi famiglie e 200 sottoclassi circa, in modo da poter rispondere alle più disparate esigenze dell'industria dell'abbigliamento. Il top di gamma è rappresentato dalla macchina a braccio a 4 aghi,

Rimoldi & CF ha sede a Gallarate (VA) www.rimoldiect.com

181/183/F84 con tutte le sottoclassi, che è l'unica di questo genere, assolutamente ergonomica, che permette all'operatrice di lavorare in modo sicuro e con una postura naturale. Le sue performance sono d'eccellenza: cuciture destinate, nella maggior parte dei casi, al contatto con la pelle, assolutamente morbide e sicure, velocità di produzione e certezza di esecuzione perfetta della cucitura, sempre». L'amministratrice della Rimoldi continua spiegando che il fiore all'occhiello della società, sono gli impianti “chiavi in mano” «per fornire, oltre alla tecnologia, anche il know-how dei propri tecnici, contribuendo così alla formazione di maestranze sempre più specializzate anche in paesi in via di sviluppo. I corsi di formazione organizzati sia in Italia che all'estero per le macchine vendute, completano il nostro profilo».

RIMOLDI & CF macchine per cucire industriali 4.0 per il mercato mondiale

RIMOLDI & CF nasce nel 1881 a Gallarate dall'unione di 2 storiche aziende leader mondiali nelle macchine per cucire a punto annodato e catenella. Guidata dalla Famiglia Pastorello, dal 2019 punta su R&S e nel 2021 alla Fiera di Francoforte presenterà 2 nuove macchine:

- a braccio 283/284 ergonomicamente all'avanguardia per i settori medicale, sportswear, seamless con motore incorporato direct-drive, differenziale elettronico e dispositivi aspira ritagli e aspira-taglia-catenella di nuova concezione;
- Ultra Rimoldi che salda in continuo tramite un sofisticato sistema di ultrasuoni rotanti, utilizzabile con materiali termoplastici e tessuti per i settori ospedaliero, automotive, nautico, abbigliamento, arredamento, grandi coperture e manifesti in PVC.

La produzione si svolge internamente e con macchinari e software ottimizza i cicli produttivi, trasformando l'officina meccanica di precisione in Industria 4.0 in grado di produrre in economia piccole serie di ricambi. Anche in un momento così particolare Stefania Pastorello prosegue con la trasformazione aziendale forte delle competenze tecnico/commerciali del team e del know-how acquisito, puntando su innovazione e flessibilità. - www.rimoldiect.com
